Fall DXpedition - Van Horn, TX Aug 10-14 2014

A GRID BANDITS DXPEDITION

This year, the K5N Grid Activation Group went to DM71 at Van Horn, TX. We all arrived at Van Horn and began setting up the station and were on the air late on Aug 11th. Our first contact was Jay-W9RM in CO. We tore down early on Aug 14h and began the drive home. Dan-N5TM made side trips to DL99, DM90, and DM70.

We made 196 6M QSOs from DM71 and Dan made 89 QSOs(mostly 2M EME) including his side trips. We worked 11 6M EME contacts this time. We got a little Es, which helped the log totals. We want to thank Dan-N5TM for the chat room that he created for us, Joey-W5TFW our QSL Manager, and JD-N0IRS for our logo.
